

Community Voices Miami and Oral Health

Current Events.

Community Voices Miami at the Collins Center for Public Policy has been following the Medicaid Oral Health Pre-Paid Pilot in Miami-Dade County since its inception in 2004.

Our goal is **to provide AHCA, legislators and stakeholders with the best available evidence of the Pilot's performance in comparison with the pre-existing state-managed dental Medicaid program for children.** We therefore commissioned an analysis of the Pilot to be performed by Burton Edelstein, DDS, MPH, professor at Columbia University's School of Dental and Oral Surgery to compliment the State contracted University of Florida evaluation.

Read [the Oral Health Pilot Policy Brief](#) which outlines the findings from the data analysis we commissioned, and the [complete Pilot analysis](#) for more information. The analysis was commissioned by Community Voices Miami, using funds provided by the Health Foundation of South Florida.

For additional information on the Oral Health pilot and related inquiries, please contact Elise Linder, Assistant Director of Community Voices Miami at 305-377-4484 ext. 26 or elinder@collinscenter.org.
